

Innovative Medical Products' Hip Abduction Pillows Assure Greater Patient Comfort and Easier Nursing Care after Hip Surgery

IMP offers three types of Hip Abduction Pillows: SLIMLINE™, Universal and Pediatric

PLAINVILLE, Conn. (April 18, 2017) – Innovative Medical Products' latex-free SLIMLINE™ convoluted foam Hip Abduction Pillow provides greater patient comfort and easier nursing care than standard abduction pillows. The SLIMLINE™ pillows measure 7.5" x 25" x 4" and come vacuum-packed, four to a case.

IMP's Hip Abduction Pillows are used to immobilize, support and align a patient's legs to prevent hip dislocation after hip surgery or injury. Hip abduction pillows allow patients to be turned to the side without removing the device.

The Universal Abduction Pillow accommodates most patients and is competitively priced. The Universal pillow measures 23.5" x 14.25" x 7" and is vacuum-packed, four to a case.

Designed specifically for pediatric patients, IMP's Pediatric Abduction Pillow measures 16" x 10.5" x 6". The pillows come vacuum-packed, five to a case.

All pillow styles feature long straps to accommodate all size calves and thighs. IMP's pillows are vacuum-packaged to save storage space. When opened about 10-15 minutes before use, the pillows will return to their original shape.

About Innovative Medical Products

Innovative Medical Products Inc® designs, manufactures, and brings to market patient positioning devices for healthcare and sports related surgeries. With more than 40 years experience in supporting hospitals, surgery centers, and clinics, IMP provides patient positioning accuracy to a surgical procedure including robotic and computer assisted surgeries. IMP devices save hospital and surgery center costs by minimizing staff to stabilize a patient or limb during surgery, as well as protecting the patient from the side effects of long surgical procedures. IMP manufactures, patents and trademarks products to Federal and international standards for quality and safety for both the patient and the healthcare institution.
