

# Reznik Universal Shoulder Positioner™

Designed for shoulder arthroscopies in the lateral position.

3 planes of adjustment~ Rotation, Horizontal, Vertical

#1 - 360° rotational adjustment

#2 - Horizontal plane with stop @ 90°

#3 - Vertical plane with a stop to prevent components from falling onto patient

Provides controlled distraction of the shoulder.

*Phase 4 Gel™ Splint* increases comfort, protects skin, controls internal & external rotation while holding the arm securely in place.

“Whether it is position, rotation control or flexibility every surgeon’s set up is possible with this simplistic universal light weight design.”

The Reznik Universal Shoulder Positioner™ can be utilized in either the lateral position, Beach Chair and for elbow arthroscopies.

“Solves a wide array of surgical needs with one device. The system represents an economical solution to the challenge of multi-surgeon, multi-surgical technique traction requirements.”
